Wiring and Multiple Channels

For **single channel** use, connect black and white power feed wires.
For **two channel** use, connect per wiring diagram in the Two Channel Control section of power supplies
For **Dynamic White** use, connect per wiring diagram in the Dynamic White section of power supplies

The Power Track contains three copper conductors allowing two channel control .

- Center conductor is common positive (+), connected to power cord red wire
- One outer conductor is channel 1 negative (-), connected to power cord black wire
- Other outer conductor is channel 2 negative (-), connected to power cord white wire

Select control channel for Stenos Directional and Ambient Modules by rotating them 180°
For two channels use, connect per wiring diagram in the Two Channel Control section of power supplies
For single channel use, connect black and white power feed wires.
